

Smart Meters were the Investment. Intelligence is the Return

Utilities worldwide are expanding their AMI deployments. Bidgely turns interval data into intelligence for customer operations, grid planning, demand management and revenue protection.

Powered by **Bidgely UtilityAI™**

Transform your AMI Data from a number to an invaluable insight

Compatible with your existing tech stack

...and more

Value to Customers

Don't just send the bill. Explain it.

Features

Itemized Bill

See exactly where energy goes, by appliance.

Bill Alerts

Proactive alerts and clear actions before bill shock.

Personalized Tips

Actionable tips tailored to household usage.

GenAI Assistant

Real-time answers to billing questions, instantly.

Benefits

15-20% Increase

Improvement in customer satisfaction (CSAT).

35-45% Fewer Calls

Shorter, less frequent high-bill call volume.

Calls Deflected

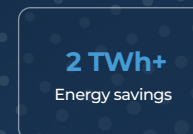

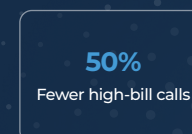

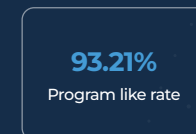

Billing queries resolved without an agent.

2-3X Engagement

More web visits and click-through rate.

Success Stories

Based on actual results achieved with Bidgely

Grid Intelligence

Find flexibility before the peak.

Features

Grid BTM Visibility

Map every load down to the grid asset level.

DER Mapping

Pinpoint solar, EV and battery usage, asset by asset

Load Forecasting

Forecast load scenarios to plan a resilient grid.

Root Cause Analysis

Spot constraints and resolve them before they escalate.

Benefits

Resolve Grid Constraints

Accurate appliance-level 8760 load curves.

Manage DER Grid Impact

Understand DER adoption to manage it optimally.

Defer and Reduce Grid Capex

Fewer transformer and feeder replacements needed.

Resolve Constraints Proactively

Accurate forecasting flags issues before they occur.

Success Stories

1.25 GWh

Flexible load found at summer peak

19%

EV load shift, preventing transformer overload

~20K EVs

Identified, above utility estimates

Based on actual results achieved with Bidgely

Revenue Protection

Reduce NTL and Theft with AI Detection

Features

Theft Detection

Identify meter bypass, tampering and misuse.

NTL Quantification

Estimate revenue at risk, customer by customer.

Booking Portal & App

Visualize and book theft cases in one easy dashboard.

Continuous Learning

Models improve with each inspection, tuned locally.

Benefits

Booking Revenue Recovery

Direct fine and assessment revenue per confirmed case.

Power Purchase Savings

Stop paying to purchase power for unmetered use.

Recurring Billing Uplift

Corrected accounts pay full billing, going forward.

Theft Deterrence Effect

Detection lowers theft as perceived risk rises.

Success Stories

5X

Strike Rate compared to utility's in-house program

100%

Project ROI within 6 months of deployment

80%+

Booking Strike Rate for Meter Tampering

Based on actual results achieved with Bidgely
